OVERVIEW

I am a Multi-Webby winning web designer and developer who has also worked in environmental design, interface and fine art. I have developed software solutions for everything from gestural interface for musical instruments to data visualizations for open source intelligence. Over the past 10 years I have focused exclusively on developing interfaces for machine learning applications.

I am available for contract work, remote or on-site in Los Angeles.

WORK HISTORY

FREELANCE

JS for AI | December 31, 2010 - May 8, 2025

Collaborated with Scientists and Business Stakeholders to develop internal and public facing websites

Developed mapping applications for scientific and government clients
